

Making Behaviors Stick

Resilience

Behavior change is the key to any lasting organizational transformation.

We teach leaders and change agents how to identify the critical behaviors that drive the outcomes they want.

Resilience is one of the qualities our clients most often seek for their workforce and leadership teams.

This workshop helps participants start building resilient behaviors and momentum toward lasting change.

After this workshop, you will be able to:

- Identify the key behaviors driving personal and team resilience.
- Determine the behaviors most impacting success.
- Begin to build an action plan to create small wins, build momentum, and make behaviors *stick*.
